PRODUCT

3. White Metal Lining Journal Bearing

Backing materials are bronze, gunmetal, steel or cast iron, purchased to specifications as customer's own specials.

White Metals are predominantly from the B5 : 25 series and occasionally customers own or specials.

White Metal lining - in most cases is carried out by the centrifugal process.

Where not possible, it is approved by Gravity Dip Coating processes.

Bonding - The adhesion of white metal is carried out chemically and verified 100% by ultrasonic usually to ISO or customer's own specification.

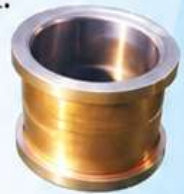

Our operators are qualified to ASNT level 2.

Repair

The State materials, equipment and processes are utilised as for when manufacturing. On receipt all items are subject to suitability inspection and report. In the case of defects in items or missing parts, the customer is always notified prior to any commencement.

Service

Our service for both manufacture and repair takes into account standard commercial delivery requirements through to round the clock working which may be necessary satisfy emergency plant breakdown situations.
